# Interiors unlimited...

The future in interior textiles no longer holds restrictions in repeating patterns and/or in color. You have complete design freedom! Imagine curtain fabrics, upholstery fabrics and wallcovering in the highest qualities and with limitless possibilities to create your own design. All products meet the high demands of the industry-and project market. Big Impact manufactures textile printing without compromise, for use in offices, retail, hospitality, hotel-and catering industry, healthcare and education.

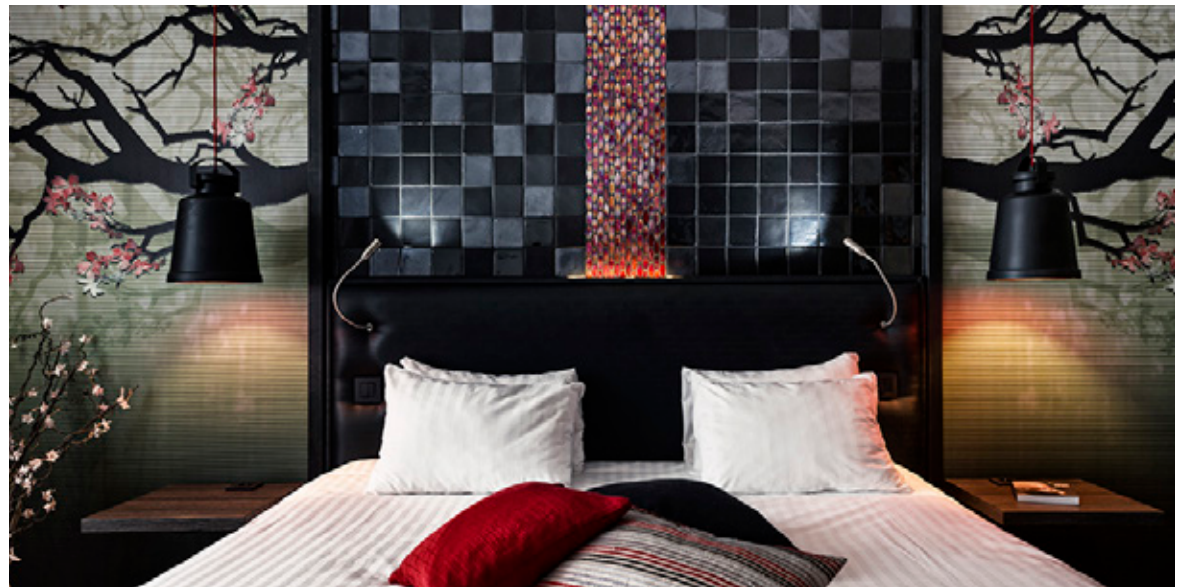

## Curtain

Curtains give each room its own character. Material, color, design and function are all critical considerations and thanks to the efforts of the newest, most advanced digital techniques printing fabrics no longer holds any restrictions.

## Wallcovering

Digital project quality wallcovering pushes the boundaries of printing. It brings walls to life and proves that modesty is a thing of the past. Each image can be applied without design compromise and can be produced in life-size proportions, with a tight, continuous image, without seams and repetitive patterns, but also separate sections with overflow, or fitting are possible.

## Upholstery

Challenge what is possible and welcome a whole new dimension in upholstery fabrics. Graphic designs, branding and all types of images can now come to life. The possibilities are endless, the quality is high and the delivery times are sharp. Anything can be achieved with your own designs and your product is sustainable and functional too.
